PROFILE

Computer Engineering student seeking a web internship. Builds full-stack applications using React, Node.js, TypeScript and MySQL — from institutional websites to e-commerce platforms and SaaS tools. Comfortable across the entire stack, with hands-on experience delivering real-world projects.

EDUCATION

ISLA – Instituto Politécnico de Gestão e Tecnologia | Vila Nova de Gaia   2023 – Present
Bachelor's Degree in Computer Engineering
Relevant coursework: Advanced Web Technologies, Artificial Intelligence, Databases, Project Management, Statistics.

Escola Secundária Manuel Gomes de Almeida | Espinho   2020 – 2023
Technician in IT Systems Management and Programming

PROJECTS

Biblioteca ISLA Gaia   2025
- Designed and built a full-stack library management system with loan tracking, book search and bibliographic cataloguing.
- Implemented a RESTful API with Node.js/Express and MySQL, structured around clearly defined data models and relationships.
- Developed a responsive React frontend with TypeScript and Tailwind CSS, enabling intuitive navigation for staff and students.

React · Node.js · Express · TypeScript · Tailwind CSS · MySQL

biblioteca-islagaia.pt

Junta de Freguesia de Sermonde   2025
- Delivered a complete institutional website for a local authority, covering services, news and public contacts.
- Structured a REST API backend with Express and MySQL to manage dynamic content updates without manual deployments.

React · Node.js · Express · TypeScript · Tailwind CSS · MySQL

jf-sermonde.pt

Arte em Ponto — E-commerce   2025
- Implemented a full purchase flow — product listing, shopping cart, Stripe checkout and order confirmation — with secure payment handling.
- Built inventory management features with stock validation on the backend to prevent overselling.

React · Node.js · Express · TypeScript · Tailwind CSS · Stripe · MySQL

arteemponto.pt

Zolentra — Helpdesk SaaS   2025
- Architected a multi-tenant SaaS helpdesk with real-time ticket updates using Socket.io, supporting multiple simultaneous users.
- Structured the application with a clean MVC pattern in Node.js/Express, separating business logic, routing and views (PUG templates).

Node.js · Express · MySQL · Socket.io · PUG

EXPERIENCE

Clínica do PC | Carvalhos, Portugal   Apr 2022 – Jul 2022
Technical Support & Web Intern
- Built and customised the clinic's website using the Weasy.io website builder, extending the default templates with custom HTML/CSS blocks to match the brand's needs.
- Diagnosed and resolved hardware and software issues on customer computers, handling repairs end-to-end.

Miguel & Alex Telemóveis e Comunicações | Santa Maria da Feira, Portugal   Jan 2021 – May 2023
Technical Support & Web Intern

- Provided frontline customer service and performed basic mobile phone repairs in a retail environment.
- Developed a website prototype for the store using PHP, gaining early hands-on experience with backend web development.

SKILLS

Languages	JavaScript | TypeScript | Python | PHP | C | C++ | SQL
Frontend	React | HTML5 | CSS3 | Tailwind CSS | PUG | Responsive Design
Backend	Node.js | Express.js | Laravel | REST API | Socket.io | MVC
Databases	MySQL | SQL Server | Database Design | Query Optimization
DevOps & Cloud	Git | GitHub | AWS | Vercel | Linux | CLI
Methodologies	Agile | MVC | OOP | Version Control | SaaS
Languages	Portuguese — Native | English — B1
